Summary

An in development full stack engineer devoted to improving myself, my knowledge, and my community. Strong management and teamwork background. Has collaborated with and mentored teams that produce exceptional outcomes in the most strenuous of situations. A background that has grown a skillset adept to find creative and strategic solutions. Student of the University of Denver coding bootcamp with strengths in communication, testing, and team management.

Technical Skills

JavaScript, HTML, CSS, C++, jQuery, Bootstrap, Bulma

Projects

National Parks Day Trip Planner | <https://github.com/trivera777/National-Parks-Day-Trip-Planner> | <https://trivera777.github.io/National-Parks-Day-Trip-Planner/>

- National Parks Day trip planner helps a user search for national parks within a state, and lists activities to do, with a 5 day weather forecast
- Role: Team management and task delegation, JavaScript functions, Google Maps, National Park Service, and OpenWeather API integration.
- Tools: HTML, CSS, JavaScript, jQuery, Google Maps API, NPS API, OpenWeather API, Bulma

Weather Dashboard | <https://github.com/SirNathanJF/Weather-Dashboard> | <https://sirnathanjf.github.io/Weather-Dashboard/>

- Weather Dashboard is a web application that allows the user to search for a city and displays current weather information as well as a five day forecast. Employs use of local storage so the user can search for previously searched cities.
- Role: Sole developer
- Tools: HTML, CSS, Javascript, jQuery, OpenWeather API, Bootstrap

TripleX | <https://github.com/SirNathanJF/TripleX>

- TripleX is a C++ application that I developed while taking an online course. It is a quiz program that takes use of local time to randomly generate numbers for questions/answers.
- Role: Sole developer
- Tools: C++
